

Staff Epidemiologist

Health Effects Institute Boston, Massachusetts

The Health Effects Institute (HEI) seeks a strong candidate to join the Institutes scientific staff with expertise in epidemiology and exposure assessment, ideally with an international perspective. HEI has an opening for a well-trained scientist to work with the Director of Science and HEI's scientific staff, along with its President, Vice President, and expert scientific committees, to help identify and understand key air pollution issues, develop requests for applications in specific topics, manage the review and selection of studies for funding, oversee ongoing studies, ensure adherence to schedules and procedures, manage the review of completed HEI studies, and draft commentaries on them, among other functions. As qualifications and experience permit, the successful candidate will also apply these skills to HEI's Public Health and Air Pollution Program which is targeted at air pollution and health in the developing countries; she/he may also be asked to assume a leadership role in this area. Experience in scientific capacity building in developing countries in Asia and an understanding of the roles and interests of international public health and regional entities (e.g., WHO) will be of added value.

Qualifications for this position are:

- Ph.D. or equivalent degree in epidemiology, biostatistics, or a similar discipline, with a focus on environmental health, preferably involving human exposure aspects of such research
- Minimum of two years of experience beyond the final degree in the air pollution field
- Excellent written and oral communication skills
- Strong interpersonal and organizational skills
- Experience of previous work in developing countries and with international organizations is highly desirable
- Authorized to work in the United States without sponsorship

HEI offers competitive salaries and excellent benefits. Interested applicants should submit a letter (including salary expectations), curriculum vitae, and two or three samples of independent writing as soon possible.
